About

Computer Engineering graduate seeking a **Junior Backend or Full-Stack Developer** role. Experienced in backend development across two stacks (**.NET 10, C#, ASP.NET Core** and **Kotlin with Spring Boot**) building internal services from scratch, designing **REST APIs**, and maintaining production systems on **PostgreSQL**. Worked with **Git, Docker, CI/CD, Kubernetes, and HashiCorp Vault** in an **Agile** team. Also delivered production frontend work in **React, TypeScript, and Tailwind CSS**, including **micro-frontend (MFE)** applications. See more in enescakmak.net.

Experience

Full Stack Developer Intern

July 2025 – August 2026

Hepsiburada, İstanbul

- Developed and maintained internal backend services using **.NET 10 and C#**, implementing new **REST API** endpoints and improving existing ones.
- Designed and built an internal **logging and observability service from the ground up** using **Kotlin** and **Spring Boot**.
- Built and maintained **micro-frontend (MFE)** applications for the customer management team using **React, TypeScript, and Tailwind CSS**, with **Redux** for shared state management.
- Developed customer-facing pages for **Hepsikredi** (consumer credit) and **Kobi Kredileri** (SME lending), along with internal **backoffice interfaces** for the fraud and Hepsikredi teams.
- Refactored backend code to resolve production issues and improve system reliability across production and test environments.
- Configured and maintained **CI/CD pipelines**, containerized and deployed services to **Kubernetes** with **Docker**.
- Monitored application logs and system health using **OpenSearch and Elasticsearch**, with **Slack** alert integrations for incident response.

IT Intern

September 2018 – June 2019

Türk Telekom, Tokat

- Assisted in troubleshooting hardware and software issues, supported system configuration and user environment setup, and gained exposure to enterprise IT infrastructure and operational workflows.

Technical Skills

Backend: C#, .NET 10, ASP.NET Core, Java, Kotlin, Spring Boot, Python, REST APIs, LINQ, Object-Oriented Programming

Databases: PostgreSQL, SQL, Liquibase, Relational Database Design, Query Optimization

DevOps & Tools: Git, GitHub, Docker, Kubernetes, CI/CD, HashiCorp Vault, Maven, Agile/Scrum, Jira, Postman

Monitoring & Cloud: OpenSearch, Elasticsearch, Google Cloud BigQuery, Slack Alerting

Frontend: JavaScript, TypeScript, React, Next.js, Redux, Micro-frontends (MFE), HTML5, CSS3, Tailwind CSS

Projects & Publications

Movie Recommendation App – movie.enescakmak.net

- Built a full-stack **Next.js, React, and TypeScript** web app that trains an **item-item collaborative filtering** engine offline on the **MovieLens ml-32m** dataset (32M ratings, 87K+ movies) and serves it to visitors as a static neighbour-table lookup.
- Implemented Google sign-in with **NextAuth**, persisted user ratings to **Cloudflare D1 (SQLite)** via REST API routes, and deployed on **Cloudflare Workers** with **Tailwind CSS** and **shadcn/ui**.

Personal Portfolio Website

- Responsive **Next.js** and **React** portfolio with accessibility optimizations, deployed on **Cloudflare Pages** with automated builds.

Healthcare Sentiment Analysis with NLP

- Co-authored an NLP research paper published in “Yapay Zeka Tabanlı Sistemler: Teori, Uygulama ve Gelecek Perspektifleri-2” (BIDGE Yayınları), processing 12,600+ patient reviews from NHS and RateMDs APIs.
- Achieved classification accuracy of **76% F1-Score** utilizing **RoBERTa**.

Analysis of Suicide Content in Social Media Posts with Deep Learning Models

- Authored a **research paper** on detecting suicidal intent in social media posts using deep learning models, implementing and comparing two novel models in this domain and achieving **97% accuracy**.
- Conducted **data preprocessing, feature extraction, and model evaluation** to improve classification performance.

Education

Marmara University

B.Sc. in Computer Engineering

İstanbul, Türkiye

2022 – 2026

Languages

Turkish: Native

English: C1 (YÖKDİL: 91/100)
